FULL STACK MERN DEVELOPER — CLOUD DEPLOYMENT

Full Stack MERN Developer with hands-on experience in building and deploying scalable web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing authentication systems, REST APIs, frontend-backend integration, and production deployment using Vercel, Render, and MongoDB Atlas.

Experienced in developing responsive user interfaces, backend services, and real-world full stack applications with secure authentication and database integration.

Passionate about backend engineering, scalable application development, debugging, and solving real-world problems through modern web technologies.

Actively seeking Remote / Work-from-Home opportunities and available for immediate joining with a personal laptop and stable high-speed internet connection.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, Mongoose, MySQL

Programming Languages: JavaScript, Python, Java

Cloud & Deployment: Vercel, Render, MongoDB Atlas

Tools: Git, GitHub, Postman, Jupyter Notebook

Core Concepts: API Integration, Authentication, Full Stack Development, MVC Architecture, Debugging

Projects

MERN Job Portal Web Application

Full Stack + Cloud Deployment

Live Demo — Backend API — GitHub Repository

- Developed a full-stack Job Portal application using MongoDB, Express.js, React.js, and Node.js.
- Implemented secure user authentication and login functionality.
- Built job listing and job application features with complete frontend-backend integration.
- Developed RESTful APIs for efficient data handling and communication.
- Deployed frontend on Vercel and backend on Render for production accessibility.
- Improved debugging and deployment troubleshooting skills through real-world deployment challenges.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Axios, JWT, Vercel, Render

NGO Management System

Full Stack Application

- Developed a scalable platform connecting NGOs with donors and volunteers.
- Implemented dashboards, authentication systems, and donation tracking functionality.
- Added automation and real-time notifications to improve transparency and communication.
- Worked on backend integration and database management.

Tech Stack: React.js, Node.js, Express.js, MySQL

Online Catering Management System

- Built a responsive catering management platform with menu browsing and event scheduling.
- Developed ordering workflow and admin dashboard functionalities.
- Implemented order tracking and user management modules.

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

Adversarial Attack Prevention System

Machine Learning

- Developed a machine learning-based system to improve model robustness.
- Applied preprocessing techniques such as normalization and noise reduction.
- Evaluated model performance using multiple preprocessing approaches.

Tech Stack: Python, Scikit-learn

Internship Experience

Development Intern – Cognitive Solutions

Mangaluru, Karnataka, India Nov 2024 – Feb 2025

- Developed machine learning models for predicting Metabolic Syndrome using healthcare datasets.
- Performed exploratory data analysis (EDA) and feature engineering to improve model performance.
- Implemented and compared algorithms including Logistic Regression, Random Forest, and Support Vector Machines.
- Generated analytical insights to support healthcare-related decision-making.
- Strengthened analytical thinking, debugging, and problem-solving skills.

Education

Master of Computer Applications (MCA)

Mangalore Institute of Technology and Engineering 2023 – 2025

CGPA: 8.17

Bachelor of Computer Applications (BCA)

Sri Bhuvanendra College, Karkala 2020 – 2023

CGPA: 8.2

Additional Information

- Open to Remote / Work-from-Home Opportunities
- Immediate Joiner
- Strong interest in Full Stack Web Development and Backend Engineering
- Available with personal laptop and stable internet connection
- Languages Known: English, Hindi, Kannada, Arabic
